

**SYSTEM AND METHOD FOR  
IMAGE FORMATION THROUGH LAMINATION**

**ABSTRACT OF THE DISCLOSURE**

- 5           A lamination imaging system of the present invention includes a printing system and a lamination module connected to the printing system. The lamination module includes a module logic unit for generating imaging instructions. The lamination module forms an image from a plurality of printed sheets sent from the printing system based on these imaging
- 10           instructions. In particular, through a lamination finishing sequence, the lamination module laminates the plurality of printed sheets to form the image.
